DIDSBURY, ALBERTA, THURSDAY, SEPTEMBER 18, 1930

\$2.00 per Year. 5 cents a copy

The Town Takes Over The Skating Rink

At the council meeting held on Monday night, Dr. Evans and Mr. J. V. Berscht, representing the Ricks Ltd., appeared before the council to discuss the matter of the skating rink for the coming season. They explained, that owing to the financial and other difficulties, they would not be in a position to make the necessary improvements to operate the rink this season, and offered to rent it to the town for five years, at a nominal rent of \$3.00 per year.

The council, realizing that it would be a hardship on the children of the town not to have a skating rink, and considering the healthful exercise to be derived from this popular winter pastime, by the older folk, accepted the proposition. It was decided to make the necessary improvements for skating, and a committee was appointed to obtain estimates for the work.

A deputation from the hockey club appeared before the council, and asked that the waiting-rooms for the skaters be enlarged, but the council decided, that owing to the business conditions at the present time, nothing could be done this year.

Figure Alberta Crop To Be 70% Bigger

Central Alberta is rapidly completing the harvesting of a grain crop that is yielding seventy per cent more than last year, with wheat of equal high quality, according to the fifth and final monthly crop report, based upon estimates made by correspondents.

With ninety per cent of the wheat cut, and fifteen per cent threshed, the average yield is placed at twenty-two bushels, as against a figure of twelve bushels an acre in the closing estimate of 1929.

Of the barley and oats, eighty per cent has been cut. Due to the late harvest this year, only one-third of the districts reported threshing got under way during the first week in September.

Mountain View Council Meeting

On Saturday, Mountain View Municipality held their regular meeting, with all the councillors present.

On account of infantile paralysis having broken out in Olds, and in view of the fact that a number of rural children attended the school fair held in Olds last Friday, it was decided to close the following rural schools: Mowers, Bennett, Samis, Betchton, Hammer, and Lone Pine.

Mr. Pepper, Provincial Government Weed Supervisor, attended the meeting and spoke on the weed question. He urged the council to have the weed inspectors check up on the threshing outfits and see that the machines and racks were thoroughly cleaned before moving from one field to another, and especially before moving to another farm, or on the public highway, and also to insist that the screening be cleared away and disposed of at every setting.

The balance of the meeting was taken up with routine matters and the passing of pay sheets and accounts.

Community Hall School Fair

Mountain View School Fair will be held in Community Hall on Wednesday, September 24th.

This school fair has been a decided success in the past, and it is expected the interest this year will be greater than ever. In addition to the regular prizes, there will be a number of special prizes, which have been donated by farmers of the district, and the business men in town. An admission fee of 25c. will be charged.

In the evening, a dance will be given, the Bellamy Orchestra supplying the music.

Mr. Allen McRae went to Calgary yesterday, and will stay over for the airplane circus.

Read the Pioneer Want Ads.

LOCAL & GENERAL

Celebration of the Holy Communion, at St. Cyprian's Church, Didsbury, on Sunday, 11 a.m.

Ranton's Big Anniversary Sale commences today, and continues during next week.

Mrs. Alexander, of Calgary, visited with Mr. and Mrs. W. J. McCoy this week.

Miss Janet Adams wishes to announce that she is giving piano lessons.

Mr. Ralph Hamlett, of Calgary, was a week-end visitor with Mr. and Mrs. J. Halton.

Messrs. Clint Reiber and Ross Ford motored to Turner Valley on Sunday.

Messrs. Percy Lunt, Wendell Gochee, and Bill Waldron, made a sight-seeing trip to Coal Camp on Sunday.

Mr. H. B. Adshead, and Miss Rose Adshead visited with Mr. and Mrs. Cecil Adshead over the week-end.

A series of dances will be held in the Didsbury Opera House, every Saturday night. Ladies, 25c. and Gents, 25c. Bellamy Orchestra. u.f.n.

St. Cyprian's W.A. will hold a Tea and Sale of home-cooking, at the home of Mrs. H. D. Booker, on Friday, September 26th. Everybody invited.

Another carload of 25 purebred heifers and an outstanding purebred cow, of the Cid breeding, with her heifer calf, were unloaded at Didsbury on Monday and taken to Norman Clarke's farm.

Mrs. C. Goodhand, who has been visiting her daughter, Mrs. Ivan Weber, returned to her home at Moose Jaw, on Saturday, Mrs. Weber accompanying her as far as Calgary.

Anyone requiring peony roots, see C. S. Mortimer. He has about 150 four and five year old roots for sale at a reasonable price. Thirty varieties to choose from. Phone 99, Didsbury. —Adv't.

The local boys are putting on a Pool Dance on September 19th. This is somewhat of a novelty, as the profits are shared with the ticketholders. Olds Elks' Orchestra. See bills for particulars. 37-2

Didsbury Rebekahs held a special meeting on Friday evening last, when they received an official visit from the Vice-president of the Alberta Rebekahs Assembly, Mrs. McGregor, of Lethbridge. Special work was put on, and after the meeting, members and visitors sat down to a daintily served supper. Speeches were given by Mrs. McGregor and several local members, and the vice-president was presented with a token of appreciation.

Mr. C. J. Wrightson has installed a Frigidaire counter this week.

Mr. Loyal Snyder spent the week-end with Lynn Hunsperger.

Mr. and Mrs. Wm. F. Reid, of Calgary, attended the funeral of little Jackie Robertson on Monday.

Mr. and Mrs. Wm. Robertson, and Kenneth, returned to their home at Coalhurst on Tuesday.

Harvest Home services will be held on Sunday at Westcott and Westerdale at the usual hour.

Mr. and Mrs. Israel Hallman were guests of Mr. and Mrs. Allen Hunsperger on Monday.

Mr. and Mrs. D. Grieve, and Marjorie and Nora, of Calgary, spent Sunday at the home of Mr. and Mrs. Allen Hunsperger.

Didsbury Rebekahs will entertain the Oddfellows and their wives and lady friends on Thursday, September 25th.

The Ladies' Aid of Knox United Church will hold a supper on Saturday afternoon, September 20th, from 5 to 7-30 p.m., in the basement of the church.

Miss Annie Pelechaty, and Mr. Allen McRae spent Wednesday afternoon at Allen Hunsperger's, helping feed and entertain the threshing crew.

Rev. H. E. Roppel left last Thursday, and returned on Tuesday from a business trip to Regina, Sask., in the interests of the North-west Canada Conference Journal, of which he is editor and publisher.

Constable Kercher is making a good improvement on the railroad side of the main street. He has torn down the old fencing, and widened the road, making considerably more room for parking.

A service will be held in the Westcott Baptist Church, on Sunday, September 21st, at 8 p.m. This service will be conducted jointly by two young men of Calgary, Mr. Sadler, and Mr. J. Gilmour.

A large number of Didsburyites attended the Harvest Home chicken supper and concert at Lone Pine Hall on Monday evening. Members of the United Church choir assisted in the concert.

"Wide Open," the all-talking picture at the Didsbury Opera House on Thursday, September 25th. A most laughable comedy, with an all-star super cast of fun-makers.

SCHOOL NEWS

The Annual Inter-Schools Track Meet will take place at Innisfail, on Friday, October 3rd, 1930. The schools competing are: Crossfield, Carstairs, Didsbury, Olds, Bowden, and Innisfail.

The beautiful cup, which was won by Olds last year, is to be competed for again this year, and will become the property of the school gaining the highest number of points.

The list of events include a full line of track and field events for boys and girls, in the following classes: 12 and under, 15 and under, open.

Obituary.

On Sunday morning last, the death occurred of John Avard, the infant son of Mr. and Mrs. Wm. Robertson, of Coalhurst, aged two months and twenty-seven days, at the home of the mother's parents, Mr. and Mrs. Avard Orde, where she and the children were visiting. The child was sick only twenty-four hours, and passed away suddenly, shortly after midnight.

The funeral was held at Mrs. Orde's residence, and the interment in the Didsbury cemetery. A large number of friends attended the funeral, and many beautiful flowers were sent. Rev. W. J. Archer conducted the services.

OIL WELL AT COAL CAMP

Mr. Whitney, an official of the Cartier Oil Company, whose drilling programme includes a well on the old Monarch structure, near Coal Camp west, was a caller at our office last week-end. Mr. Whitney is very optimistic concerning the company's chances of obtaining a good flow of crude oil in the west country.

The drilling site decided upon by the company's geologists is at a point three miles west of the old Monarch well, which was also the favored spot chosen by Mr. Dunn, when working in the interest of the now defunct Monarch Oil Company as geologists. The Monarch well was drilled on a second choice location as a test well, as the original spot was very difficult of access.

The Cartier Oil Company, according to Mr. Whitney, is opening up a road around the bank to prevent hauling the heavy machinery up a very steep and winding incline.

Planning, Saving, Investing

"To have AND to hold," when applied to money, does not seem to be an easy lesson for most people to learn. The word "and" is stressed because during the recent stock market slump there have been millions who have failed to do the "holding." They have emerged as losers. They have allowed the lure of speculation to divert their time and attention from their regular occupations and interests to a field of activity about which they knew next to nothing. So it seems that most of us need to concentrate more on the "holding" part of our financial plan.

So writes Leroy D. Peavey, president of the well known Babson's Statistical Organization, who, from an income-producing point of view divides the average individual's life into roughly three parts. The first, from about age twenty to age thirty, might be called the period of preparation or getting settled. The second, from thirty to the late fifties, is the period of accumulation. The third, from the late fifties on, is the age of retirement or at least of lessened earning power.

No matter how much time and money may be expended during the teens and twenties in preparing young people for their life work, they can never, says Mr. Peavey, be independent during the last period of life unless they have made good use of those twenty-five or more golden years in the second period. It is during this period of accumulation that one's surplus must be built up and judiciously invested if one hopes to be independent the rest of his days. His watchwords should be Plan, Save and Invest.

Planning means the making and using of a budget. The budget is the floor-plan of your financial structure. Fit it to your own situation and then stick to it, instead of shelving it after a couple of trials. Of what good are blue prints if the structure does not grow up in accordance with their specifications? And one of these specifications will be the proportion—whatever it may be—of your income that is to be set aside as savings. Another specification will be the determination to have a home of your own some day,—one that eventually will be free and clear. Because it is free of mortgages or other claims, it will stand between your family and distress. Life insurance and other sound investments should likewise be included.

The second watchword, "Saving," has been brought to the consciousness of the people of this generation by many years of educational effort. It has been adopted by hundreds of thousands of Canadians as evidenced by savings accounts in post offices and banks. It was given a great impetus during the war when, through the urge of patriotism and in response to the call to sacrifice to "win the war," thousands of people who never before had invested in a bond bought Victory Bonds, and thus learned the lesson of how easy it is for money to accumulate and multiply itself through interest payments. But the lesson of saving is one that must be taught to each successive generation, and there should be no slackening in the effort. It is a lesson that all parents should see their children learn early in life and continually practice, until the savings habit is formed.

When it comes to "Investing," you have the choice between invoking the almost unbelievable power of compound interest when harnessed to regular monthly savings, on one hand; on the other, putting the money into well seasoned securities. In the first case you need no particular advice, for in its operation compound interest is both tireless and automatic. In the second instance, that is, with investment securities, you need advice of the most discriminating sort. This fortunately, you can easily obtain from your own banker.

You will want to have among your investments some good sound bonds anyway, and then if your available funds permit, some of the best stocks. The latter should be bought outright and never on a shoestring margin. Remember this, too. It is wise to keep a part of your funds in liquid form,—that is, in cash or such short-term securities as can quickly be converted into cash. Then you will be prepared for emergencies. You might need this money for a personal emergency, or for some special investment bargain in the market that had come to your attention.

The point is to put each spare dollar to work, twenty-four hours a day and each day in the year, earning more income for you. Your ability to "spare" these dollars for such a proposition will lead to a surprising increase in your "sparing" power; that is your ability to save. You will be able to see with your own eyes the rising structure of financial independence that is going to stand you in such good stead later in life. But in order that your future income may be ready when you need it, start to build that income NOW.

The word "investment" should be broadly interpreted to include not only bank accounts and securities, but insurance policies, your own home, real estate, mortgages, and other forms of capital. Life insurance is indeed important. It not only helps people to save, but it is a protection as well as an investment. Every person should carry life insurance, but, on the other hand, it is not the part of wisdom to place all your earnings in life insurance. Follow instead the practice of diversifying your investments—part in a savings account, part in life insurance, and part in sound securities.

And, above all, turn to hard work, initiative and perseverance, as the right means of accumulating sufficient funds for your needs, rather than the purely speculative stock market in the hope of getting something for nothing. Lastly, carry out the principle that "godliness with contentment is great gain," in your finances as well as in the rest of your life.

Report On Gas Fields

Member Of Geological Survey Of Canada To Make Report On Saskatchewan

Dr. G. S. Hume, of the Geological Survey, of Canada, will make an immediate survey from all available data, of the prospects of finding gas in Saskatchewan, in suitable quantities within the province.

He will not make any actual investigation in the field at the present time, but having visited each city interested in gas development and gathered material from other sources will make a report based on geological information already obtained by various survey parties.

This report, framed as it affects the various cities interested, will be submitted to the Dominion Government, which in turn will forward it to the provincial government. The joint committee, representative of four cities of Saskatchewan interested in the gas question, will then be put in possession of all the facts obtained.

This was the outcome of a conference held at the parliament buildings, at Regina, when Dr. Hume met five members of the Saskatchewan Government and also of the four-cities gas committee.

Is Baby Teething?

Teething time is a time of worry to most mothers. The baby is nervous, fretful, feverish. His little gums are swollen and sore; diarrhoea, constipation, colic and sometimes convulsions set in—neither baby nor mother can sleep.

These troubles can be quickly banished, however, through the use of Baby's Own Tablets concerning which Mrs. Louis Grubb, Teeswater, Ont., says:—"I have used the Tablets for all my babies while teething and have found them a splendid medicine."

Baby's Own Tablets are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Wheat Pool Membership

The Canadian Wheat Pool now has a membership of 142,000, the number of members having been increased by more than 2,000 within the year, according to Gillis Percell, of the Canadian Press.

Many infants are infested by worms which cause great suffering, and if not promptly dealt with may cause constitutional weaknesses difficult to remedy. Miller's Worm Powders will clear the stomach and bowels of worms and will so act upon the system that there will be no recurrence of the trouble. And not only this, but they will repair the injuries to the organs that worms cause and restore them to soundness.

First Transcontinental Levels

The first Canadian transcontinental line of precise levels was completed by the Geodetic Survey of Canada in 1916.

A Corrector Of Pulmonary Troubles.—Many testimonials could be presented showing the great efficacy of Dr. Thomas' Electric Oil in correcting disorders of the respiratory processes, but the best testimonial is experience and the Oil is recommended to all who suffer from these disorders with the certainty that they will find relief. It will allay inflammation in the bronchial tubes.

B.C. Hydro Development

Possibility of developing 3,000,000 horse-power from rivers along the coast district of British Columbia is disclosed by engineers.

Soft corns and warts are ugly, painful and irritating. Remove them quickly and surely with Douglas' Egyptian Liniment.

Crude Oil Consumption

At present only about 2½ per cent. of our crude oil consumption is produced in Canada.

ENO'S "FRUIT SALT"

Doctors Warn Against Drastic Purgatives

Physicians know the danger of using cheap cathartics that create a harsh, unnatural intestinal activity. They know that ENO'S "Fruit Salt" is more than a laxative. It is a delicious health beverage that sweetens and tones up the entire system—and that its daily use—just a dash in a glass of water, every morning—is an aid to vigorous good health.

No Cause For Alarm

Says Russia Will Not Be Factor In Wheat Exportation For Some Time

Thomas D. Campbell, of Hardin, Mont., who has been called the world's largest wheat grower, returned recently from a trip to Russia as agricultural consultant to the Soviet, and announced that it would be longer than alarmists thought before Russia was a factor in any export field.

As the country's five-year program progresses, he said, the needs of the country also increase. The more she grows the more she consumes. It will be at least three years before the Soviet government is a factor in the export of grain or any other commodity. Very soon the internal needs of the country will call for 1,000,000,000 bushels of wheat annually, just as an example.

Pioneer Mountie Dies

Peter O'Hare, 77, pioneer mounted policeman of the west, died recently at Maple Creek. Since the earliest days of the police in Saskatchewan Mr. O'Hare was associated with all activities, taking part in the Riel Rebellion engagement. His service extended over 40 years.

Protect the child from the ravages of worms by using Mother Graves' Worm Exterminator. It is a standard remedy, and years of use have enhanced its reputation.

Honey has become so popular in the British Isles that while 1,100 tons were produced there in the last 12 months, fully 3,500 tons, valued at \$2,000,000, were imported.

Encourage Sheep Industry

Economic Survey Of Sheep Ranches Of Western Provinces To Be Undertaken

An economic survey of sheep ranching in Saskatchewan, Alberta and British Columbia, is being undertaken by the Dominion Department of Agriculture, under the direction of the agricultural economics branch in co-operation with the Dominion Experimental Farms. This is the beginning of a programme of research work in agricultural economics on behalf of the livestock industry.

Plan For Wholesale Emigration From Britain As Solution Of The Unemployment Problem

Wholesale emigration under the direction of public utilities, which would be given special concessions for buying or leasing large tracts of vacant land which would be developed with the aid of the British and Dominion governments, is Labor's newest scheme for a solution of the unemployment problem which is costing Great Britain \$700 per minute.

Horace Greeley's "go west, young man," would become "go east or west" for the plan embraces all parts of the Empire. The idea will be brought up at the forthcoming Imperial Conference, in London, England, with the hope that the Dominions will approve the scheme and agree to a partnership with the Labor Government in finding a place for the more than 2,000,000 persons unable to find work in Britain.

The plan is a new approach on the the government feel that the old systems of homesteads and other piecemeal movements of people were wholly ineffective under modern conditions and that the Dominions were also opposed to any haphazard they would only swell the ranks of undirected influx of British where their unemployed.

The scheme is therefore a pretentious plan to find a place for those at present unemployed and not wanted. The utilities would be given co-operation in acquiring land and the development of virgin territories would be left in their hands. The British and Dominion governments would aid in carrying out a comprehensive plan to settle the new territory and emigrants would be furnished as man power for the markets needed to establish a new economic frontier.

The government is pushing the project for a new type of pioneer and the unemployment problem of the even claim the idea is a solution of Dominions as well, since the opened territory will be open to the workless there as well as England. It also claims that thousands are willing to leave immediately, but the uncertainty of unemployment holds them in England for their dole.

It is understood that one Dominion has already endorsed the scheme. There is no anticipation of Britain or among the proponents trouble in finding investors in in the event the plan is adopted.

To Relieve Unemployed

Nearly 12,000 Extra Men Engaged By C.P.R. On Improvements From Coast To Coast

Nearly 12,000 extra men are finding employment this summer in the Canadian Pacific Railway's programme of construction, maintenance and improvement, from coast to coast. Construction work of all kinds is being done both directly by the company and also by contractors, the company itself employing some 8,000 men in "extra gangs" throughout its system. The varied programme includes the laying of branch lines; repairing and renovation of right-of-way, bridges, tunnels, stations, and other buildings. The men, in general, are recruited as near as possible to the scene of work and kept steadily employed until each job is finished.

A motion picture screen which permits showing pictures outdoors and in lighted halls has been invented by two French engineers.

"I have lost my biggest creditor."
"Is he dead?"

Largely Self-Supporting

Many Canadian Industries Capable Of Supplying Home Market

According to figures issued by the Dominion Bureau of Statistics, the Canadian dairy industry provided over 98 per cent. of the 34,691,765 pounds of cheese consumed in Canada, in 1929, and two-thirds of the 299,348,271 pounds of butter consumed. Sugar consumption, in 1929, amounted to 944,963,712 pounds, of which 98 per cent. was refined in Canadian refineries. Salt consumption amounted 497,371 tons, of which two-thirds was Canadian-manufactured. Slightly over 50 per cent. of the 14,077,677 tons of coal made available to the Canadian public in the first six months, in 1930, was mined in Canada. The value of radios and radio parts made available to the Canadian public, in 1929, amounted to \$31,750,293, of which nearly 70 per cent. was manufactured in Canada.

Canada Holding Trade Position

Dominion Maintains Place Among Leading Trading Countries Of the World

Ottawa, Ont.—Canada maintained her position among the leading trading countries of the world in the fiscal year ending March 31, 1930, despite a sharp decline in export trade and a slight falling off in import trade. This is disclosed in the condensed preliminary report on the trade of Canada, 1930, issued recently by the Dominion Bureau of Statistics.

The year was marked by an unfavorable balance of trade of \$103,335,512 compared with a favorable balance the year before of \$123,216,984. This was attributed to the falling off in the export of grains, particularly wheat, to the United Kingdom and continental Europe, due partly to lower yields.

Canada's total trade in the last fiscal year was \$2,393,212,000 compared with the total of \$2,654,575,000 in 1929, and \$2,359,555,000 in 1928. It is thus seen that while trade last year showed a falling off in comparison with the year before, it was still in excess of the total in the year ending March 31, 1928.

Imports last year amounted to \$1,248,273,582, compared with \$1,265,679,091 the previous year. The sharp decline in exports is indicated by the total figure of \$1,144,938,070, compared with the 1929 figure of \$1,388,896,075. The decrease in exports was \$243,958,005, and the decrease in imports was \$17,405,553, 17.6 per cent. for exports, and 1.4 per cent. for imports.

In export trade Canada leads the world in the export of printing paper, nickel, and asbestos; occupies second place in exports of automobiles, wheat and wheat flour, and fourth place in exports of wood pulp as well as a very high place in the world's exports of such staple products as lumber, fish, copper, raw furs, whiskey, meats, rubber tires, farm implements and raw gold.

Sidewalk cafes have been introduced in Havana.

Valuable Resources Going To Waste As Vast Quantities Of Natural Gas Are Burned In Air

Asbestos In Manitoba

Valuable Mineral Located At Two Points In Northern Part Of Province

The reported discovery of asbestos at two points in Northern Manitoba may broaden the range of Manitoba's mineral wealth, but cannot affect the national leadership in asbestos production, which is already securely held by Canada. Canada produces about 74 per cent. of the world's supply of asbestos, Rhodesia about nine per cent., Russia about six per cent., and South African about six per cent., the remaining production being distributed in small quantities among other countries.

Asbestos, although a mineral, consists of silk-like threads which can be spun and woven much as a textile is. On account of its fire-proof quality it is used extensively in building and in manufacturing. Canadian shipments, in 1929, amounted to 306,055 tons, valued at \$13,172,581, an increase of 12.1 per cent. in quantity, and 17.2 per cent. in value over the previous year.

Good Road Making Material

Meet With Success In Extraction Of Tar From Sands In Northern Alberta

Success in the extraction of tar from bituminous sands in the McMurray area of Northern Alberta is said to have crowned ten years of effort on the part of D. K. A. Clark, of the University of Alberta. It is reported that 95 per cent. pure tar was taken from the sands in recent experiments and it is believed that thousands of dollars may be saved in road-building and other developments as a result of the availability of this material.

JUDGES FOR CANADIAN NATIONAL COMMUNITY PROGRESS COMPETITIONS

Outstanding men and women, conversant with conditions throughout the prairie provinces, who have been selected by the Canadian National Railways to judge competitions among rural communities in the three prairie provinces, which are of European origin, to be held annually for a period of five years, with three substantial prizes of \$1,000.00, \$500.00, and \$250.00 respectively, to be awarded each year in each of these provinces.

Suppose by some accident, all the coal mines of Alberta should suddenly be set on fire and, before the fire were extinguished, a full year's output of Alberta coal should be destroyed. And suppose, while the fire were going on, that the government took no steps to prevent this gigantic loss. What an outcry would echo from ocean to ocean in Canada against such a national scandal. Yet, in another form, that is exactly what is taking place day by day.

Natural gas, more efficient for heating than coal, is being burned in the air in Turner Valley annually at a rate nearly equal to the entire Alberta production of coal in 1927.

In 1927, Alberta produced a total of 6,034,164 tons of coal. In 1929, Alberta burned, in the air, in Turner Valley, 109,500 millions of cubic feet of natural gas, equivalent in heating value to 6,570,000 tons of coal.

In 1929, Alberta coal production increased to 7,335,489 tons of coal. But, at the rate new wells are being drilled in Turner Valley, the natural gas which will be burned as waste there in the coming year, will exceed Alberta's banner year of coal production. These are not fanciful calculations. They are careful estimates, made conservatively, by gas and heating engineers. Enough natural gas went to waste in Turner Valley, between August 1, 1929, and August 1, 1930, to supply the needs of present Alberta users for 15 years. Assuming that Saskatchewan were to use eight billion cubic feet per year, as compared with Alberta's six and a half billion, enough gas went to waste in that time to supply Saskatchewan for 12 years.

Compared with coal, enough gas goes to waste in Turner Valley every day to equal nine train loads of high grade coal, each train being of 50 cars, and each car containing 40 tons. Thus, fuel equal to 18,000 tons of coal goes to waste. Multiply that by 365 for the total wasted each year and the figure looks like light years in connection with a star on the outer rim of the universe, 6,750,000 tons a year to be exact. The daily waste, on an average from August, 1929, until August, 1930, amounted to 300,000,000 cubic feet. Against this an average of only 20,000,000 cubic feet per day was used.

If these train loads of heat had to be shipped out of Alberta just as her wheat is shipped, the railways would have to supply facilities for two-thirds more trains than in the biggest rush season of the year. Ordinarily about 600 cars of grain are inspected at Calgary daily following the harvest. At that rate, on the same basis, these cars would constitute 12 trains. Therefore it would work out to nine heat trains and 12 wheat trains per day.

But that is only part of it. The wastage between August 1, 1928, and August 1, 1929, on the same basis, would have worked out to six train loads of heat per day, so, in a like ratio, the wastage for that year was just two-thirds of the wastage figured out for the season 1929-30.

These figures have all been for the past. The future can hardly be guessed. At present 50 wells are producing, and it is possible that 250 similar wells could be brought in without difficulty. Then the figures would be just multiplied by five. And Turner Valley is only one valley. There are others with possibilities according to geologists and experts in the oil game.

All airports in the United Kingdom now are government controlled.

"Do you know what to look out for when fishing, sonny?"
"Of course I do—the policeman."

Caught Every Way**Farmer Is Confronted with Trying Conditions These Days**

No one can dispute that the farmer is a man sore beset by difficulties these days. With the price of wheat a wavering uncertainty of the future, he must still get his crop off, hire his hands and pay his harvesting expenses. While he is able to secure labor more cheaply than in previous years, the bills still mount up. He has the responsibility of paying and feeding his men, taking his chance on the future.

No doubt he would infinitely prefer to pay higher wages, and be sure of higher prices for his grain. But he has to shave expenses, even while admitting that \$2.00 is not a good wage for the labor of stooking.

From the viewpoint of the laborers \$2.00 is not a wage that will permit them to put any substantial sum away for winter. If they have families, it will do no more than carry the families in the present months.

The fact is that both the farmer and the laborer are in unhappy position. Other commodities have not dropped in proportion to grain and livestock.

The farmer sells his cows at four and a half cents and buys them back over the block at from 25c to 30c. He sells wheat cheap, if at all, and buys bread for the same old price. No kind of wearing apparel has dropped in proportion to grain, neither have foodstuffs. There is little difference in the cost of feeding a harvest hand this year from two years ago. The only saving can be in wages.

If the buying power of \$2.00 was as great today as \$4.00 was two years ago, there would be no reason for complaint. But it is not. And the consequence is that the harvest laborer is being ground between the necessity of the farmer and the inclination of the manufacturer.

With the long continued drop in wheat, there should be some substantial corresponding reduction in other commodities. Unfortunately, such is not the case, and the situation presents serious economic unfairnesses.

To mention only one insignificant general purchase, tobacco, which, while not a necessity, is a real solace, has maintained its relentless price, quite regardless of the fact that Canadian grown tobacco is now being used in factories and the tobacco farmers are not making wealth.

It is time that the mass of consumers received some adequate protection and that the price of wheat, served more nearly as a standard for other staples.

LOCAL & GENERAL

Mr. Bill Teskey, of Calgary, spent the week-end with his parents.

Miss Laura Liesemer was a Calgary visitor on Monday.

Misses Evelyn Liesemer and Winnie Studer, spent the week-end at Sylvan Lake.

Miss Vada Mahardt, of Hannah, spent the week-end at the Berscht home.

Mrs. Ranton and Miss Margaret, were visitors to the southern city on Saturday.

Mr. Harold Stauffer, of Antelope, Saskatchewan, who was with the C.P.R. here for several years, is visiting here.

Mr. Harry Bricker, of Calgary, was renewing acquaintances, and looking after his interests here, last week.

Mr. L. Robson, accountant at the Royal Bank, has been transferred to Lacombe, and will take up a position as accountant at that branch.

Mrs. C. L. Cipperley, who has been in the Didsbury Hospital for several weeks, was able to return home on Monday.

Messrs. Elmer Liesemer and Orval Geiger left for Calgary the beginning of the week, to take up their positions as teachers in that city.

Mr. and Mrs. W. G. Holden, of Calgary, were Sunday visitors with Mr. and Mrs. W. H. B. Sharp. Mr. Holden is with the Air Mail, between Calgary and Moose Jaw.

Mr. and Mrs. Humphrey Hughes, of Winchester, Ontario, and Mr. Thos. Belway, of Calgary, spent a few days last week with Mr. and Mrs. T. A. Duncan.

The Bellamy Orchestra report a splendid success with the Saturday Night Dances. The 25c. price to everyone, is very popular, and the exercise you get in a few hours' dancing is more beneficial to both old and young, than rounds on the golf course.

Mr. W. C. Boyd, of Grande Prairie, Peace River, spent the past week with Mr. and Mrs. W. H. B. Sharp. Mr. Boyd, having come by 'plane into Calgary, will return the same way on Tuesday. He reports, that when flying low, he saw numerous wild animals, bears, deer, and caribou being very plentiful. While here, he purchased a complete talking-picture equipment through Mr. Sharp, the Alberta representative for the Holmes Sound Equipment.

Town Planning In Alberta

Being a Series of Short Articles Explanatory of the Provisions Of The Alberta Town Planning Act, and Regulations Thereunder.

By
HORACE L. SEYMOUR,
Provincial Director of Town Planning.

Article 3.

Disposal of Lands, Other than by Registered Plans.

In a previous article, the regulations governing the subdivision of land were discussed.

After the registration of a subdivision, there frequently occurred, in the past, the splitting up of registered lots by description, resulting in lots of too narrow width for desirable home occupation, or in an undesirable change of frontage. In many instances, where a subdivision or townsite has been registered, there is also a tendency for the owner of adjoining lands, to sell or lease, (generally for the purpose of erecting dwellings) lots of from one half-acre up, but to do this by description, without survey, and frequently, by agreement of sale, so that officially, nothing is known of the transaction for some time. There has thus often arisen, a very undesirable condition, with buildings erected without reference to existing subdivision or development, and often blocking further desirable development.

Section 43, of the Town Planning Act, has been enacted to take care of the above and similar situations. No more than one dwelling is ordinarily legally permitted on any registered parcel. (unless used exclusively for agricultural purposes) and new parcels of land cannot be loosely defined by description, but only under authoritative approval on behalf of the Provincial Town Planning Board. Just what this legislation may mean to the future advantage of the Province, can be best realized by a consideration of the many difficulties that have arisen, where such provisions were not made effective, or carried out in the past.

FIELD SIZE COUNTS

With the average size of farms steadily increasing, with the increasing use of large capacity power-driven types of machinery, and with the increasing importance of crop rotation in maintaining soil fertility the laying out and size of fields becomes a matter of increasing importance. Field Husbandry experts of the Dominion Department of Agriculture stress the value of large fields in farm operation. They find that larger fields decrease loss of time in turning large profits; the more turns there are the greater is the tendency to rest often. Large fields mean fewer rods of fence to build, and a smaller amount of untillable area to foster weed growth. It takes 50 rods of fence to enclose a square field of one acre, while it takes only eight rods of fence per acre to enclose a square field of ten acres. Oblong fields from one and one-half to three times as long as they are wide are especially satisfactory—the long fields are best for tractor use. Square fields take the fewest rods of fence per acre. Very badly shaped fields should be kept in hay or pasture as much as possible. Large fields, properly laid out, save time and money.

Canada has again blazed the trail in the Arctic by providing a fully equipped miniature hospital ship for use in the Canadian Arctic. The ship, called the Medico, is a 38-foot cabin cruiser type. At present it is on its way to Aklavik, North-West Territories, which will be its base of operations. Its operating base will make the Medico the most northerly situated hospital ship in the world. The ship will be used to convey patients from any place that can be

WORLD HAPPENINGS BRIEFLY TOLD

The first member of the Canadian navy to qualify for pension is Charles J. Hill. He enlisted in 1911.

The coronation of King Carlos II., of Roumania, has been definitely postponed, and will take place in the spring of 1931. Queen Helen plans a prolonged absence on a journey.

An order sheet of any Fascist party states that the total death, in Italy, of the earthquake of July 23, numbered only 1,475, in contrast to the previous official total of 2,142.

The Canadian Wheat Pool now has a membership of 142,000, the number of members having increased by more than 2,000 within the year, according to Gillis Percell, of the Canadian Press.

Drastic action to end the recent hoarding of silver coin in Russia has been taken by the Soviet secret police. Four men, convicted of counter-revolutionary activities, were arrested and shot. They were a speculator, cashier, and two traders.

The dumping of inferior gasoline by United States companies into the Canadian market has severely hit local oil refineries. Toronto refineries have been forced to lay off from 25 to 90 men because of the dumping of this oil.

In a further effort to bring before the people of the province the great variety of the products of farm and factory, the Made-in-Manitoba Committee of the Winnipeg Industrial Development Bureau is staging an extensive publicity program.

Records at Meridian Cabin, at the entrance of Prince Albert National Park, reveal that 14,000 persons have entered Saskatchewan's playground since the opening of the present season. Park officials are confident the 1930 total will reach, if not exceed, 20,000 before the season ends.

Development of a petrified forest six miles east of Drumheller, Alberta, was discussed by the Drumheller town planning commission, and a recommendation made to the Parks Development Board of Alberta that a survey of the bad lands in the vicinity be made with a view to the creation of a national park.

Canadian Cheese Grading

There has been a steady improvement of the quality of cheese year by year since grading was undertaken by the Department of Agriculture at Ottawa, about seven years ago. The chief of the division of dairy produce in the department states that a new mark has been set in 1929 when 93.1 per cent. graded were found to be of first grade.

Technical School For Saskatoon

"FRUIT-A-TIVES" DID IT

W. N. U. 1852

The Wheat Stem Sawfly

By Major H. G. L. Strange, Director
Agricultural Research Department,
Searle Grain Company, Limited

This insect, which up till 1914 had only been the cause of a comparatively small amount of damage in Western Canada, and that in Manitoba alone, has since that date rapidly spread over Saskatchewan and Alberta, and is now damaging crops almost up to the Rockies.

Entomologists who have given the sawfly a great deal of investigation and study, are of the opinion that the sawfly is with the wheat grower to stay, and that the control or partial control of sawflies will have to be one of the operations of the wheat grower that will rank in importance with any other farm operation.

The wheat stem sawfly normally lives in the prairie grasses, but of late years has developed a liking for wheat, and is damaging crops and causing direct money loss to farmers more and more each year, until today the losses due to the sawfly are estimated to run into millions of bushels per annum in each of the Provinces of Manitoba, Saskatchewan, and Alberta.

Neglect of any attempt to control the sawfly has resulted in some years in from seventy to one hundred per cent. loss in certain districts in the West.

Fortunately, however, in the majority of wheat growing districts at the present moment, the wheat stem sawfly only operates and damages wheat around the edges of the fields, particularly around the edges of those fields that are growing a crop on stubble.

Entomologists who have given particular study to the sawfly are of the opinion, from the result of their careful investigations and experiments, that no cultural methods are really very effective in the control of this insect pest.

They have found, however, that there is a certain and definite way to minimize the damage to wheat, and in time avoid any damage whatever.

This is by the seeding of what is called a "trap crop" around the edges of the fields, and in addition around the edges of any sloughs or water-courses inside the fields where the native grasses can grow, because it is in these native grasses that the insect usually lives over during the winter.

Oats make a very good "trap crop." The sawfly lays its eggs in the oats and eventually becomes drowned out in the stem. The oats, however, must be seeded before the wheat.

By far the best "trap crop," however, is brome grass, and it has been found that if a permanent crop of brome grass is maintained completely around the edge of a field, the brome grass strip to be from eight to ten feet wide, then the field will be almost certainly protected from sawfly damage. The brome grass can be cut for hay or can be allowed to mature and cut for seed.

Unless some effort is made along the lines indicated, the entomologists assure us that the losses from sawfly damage will steadily increase.

Sometimes a crop that is known to be affected with sawflies can be saved by cutting on the green side before the wheat stem has been cut by the sawfly. This, however, is only a temporary method, because the grade of the threshed grain is usually reduced.

A permanent trap of brome grass is the only sure method advised.

Wheat growers should note carefully those fields which are damaged this fall and take means to combat the trouble for next year.

Universities, Dominion Experimental Farms and Government Departments of Agriculture will gladly supply further details of this damaging pest.

Area Of Manitoba

The area of Manitoba is 251,832 square miles according to information furnished by the Dominion Government. Of this area, the Topographical Survey, Department of the Interior, has issued thirteen sheets of the National Topographic Map of Canada, either wholly or partially in the province. Each of these sheets covers an area of approximately six thousand square miles.

The world now has 7,000,000 acres of land planted to rubber.

Minard's Liniment removes Warts, relieves Bunions.

Rust Resistant Wheat

Hope Variety Of Wheat Is Grown On
Farm At Yorkton, Sask.

New hard spring wheat, which has proved itself to be rust resistant, has been grown on the farm of Henry Beck, near Yorkton, Sask., under the variety name of "Hope" and has created considerable interest in the farmers and business men of the community.

Mr. Beck is the manager of Dunlops, Ltd., of Yorkton, and being interested in agriculture decided to do some experimenting with this new variety of wheat when it was originated four years ago.

In 1928 this variety of wheat was selling for \$97 a bushel and so limited was the supply that only one ounce was issued each farmer of a certain district.

Planting the ounce, for which he had paid the sum of \$1.00, Mr. Beck secured a total yield of one and one-quarter pounds in the fall of 1928.

The following year he sowed the pound and a quarter and that fall the yield amounted to slightly more than one and one-quarter bushels.

Last spring he again sowed his wheat crop of "Hope" wheat and the stand at present indicates that the crop harvested will yield about thirty bushels or better.

"Hope" wheat is claimed by its originator, Edgar S. McFadden, and by its distributors, the Farmers' Seed and Nursery Company, of Fairbault, Minnesota, to be practically immune from black stem and leaf rust, is highly resistant to bunt or stinking and leaf smut, and highly resistant to leaf scab and root rot.

Mr. Beck expressed an opinion that the straw in his patch is strong and wiry and the heads non-shattering. When interviewed, Mr. Beck stated that while the crops on both sides of his acre containing the "Hope" wheat has been affected by rust there is no indications of rust in his small patch.

Interesting Moments

When Queen Mary opened the Bethlehem Royal Hospital, recently, the architect asked the Queen if she would accept a special memento, instead of the customary golden key, and Her Majesty was obviously delighted, as she was handed an antique Chinese vase which she had admired on a previous visit to the old hospital.

London is to have a children's museum, containing toys and clothes of children of all ages and races.

Ruins of streets, shops and villas of one section of ancient Carthage are being excavated.

An Amazing Exploit

Two Young Boys Set Out To Sea In
A Stolen Yacht

An amazing exploit by two London, England, boys, aged twelve and thirteen, who set out to sea in a yacht, was revealed recently.

The boys, who lived at Hornsey, filled two suitcases with bread, meat and bottles of water, and travelled to Southend. They waited until darkness fell, and then crept over the mud to the racing yacht "Nomad," which was moored off Leigh. On board the yacht, they lay down to sleep until the tide rose.

When the "Nomad" was afloat, they cast off the moorings, hoisted the mainsail a few feet, and with the tiller lashed, began their adventure.

Neither of them knew anything about sailing, but they determined to go to Dover and return, so that their school mates would acclaim them as heroes.

But the plan miscarried. The yacht drifted helplessly about the Thames estuary, all through the night. Liners constantly passed her, and the boys several times narrowly escaped being run down.

Then, in the morning, the yacht was seen drifting towards the harbor at Sheerness. Boatmen put out and were able to save her from crashing into the harbor wall. The boys were lying, helpless and frightened, in the cabin.

A waterman sailed the yacht back to Southend. On the way, the yacht was seen by the owner, Major W. J. Edwards, of the Essex Yacht Club, and he intercepted her in a motor launch.

The death penalty for crime has been abolished in Denmark.

Acid Stomach

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many

times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Please let it show you—now. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

HER FAT IS MELTING FAST AWAY

All over the world Kruschen Salts is appealing to girls and women who strive for an attractive, free-from-fat figure that cannot fail to win admiration.

Here's the recipe that banishes fat and brings into blossom all the natural attractiveness that every woman possesses.

Every morning take one-half teaspoon of Kruschen Salts in a glass of hot water before breakfast.

Be sure and do this every morning for "It's the daily dose that takes off the fat." Don't miss a morning.

Kruschen daily means that every particle of poisonous waste matter and harmful acids and gases are expelled from the system.

At the same time the stomach, liver, kidneys and bowels are toned up and the pure, fresh blood containing Nature's six life-giving salts is carried to every organ, gland, nerve and fibre of the body, and this is followed by "that Kruschen feeling" of energetic health and activity that is reflected in bright eyes, clear skin, cheerful vivacity and charming figure.

CHAPTER XXVI.—Continued.

"I don't want anything but a cup o' tea, dearie, and maybe a slice o' toast. I remember Edward Howe saying that old folks don't need much come night. And—see here, chiddy—the doctor told me about your plans and everything. I guess he thought he'd save you the trouble; and you're not to worry about me. I've always thought it would be kind of fun to live in a small house, and it'll be a sight easier for you. It'll be easier for me, too, not to go over the stairs come night. Besides, I'll be able to see a half block farther down the street from that window! And it's going to be wonderful having you home all day. You needn't worry a mite about how I'll take it, Charmian. Between you and me, dearie, I think it's going to be fun!"

Only after the girl had turned away, undecieved, and unable to speak at this display of bravery, did the old lips tremble.

"Thank God that's over," murmured Grandma brokenly, while two big tears crept slowly down over her wrinkled cheeks.

CHAPTER XXVII

There were times during the days that followed when Charmian found it difficult to believe that she and Grandma would ever leave the shelter of the homestead. They seldom talked about it, but when the impending changes could not be ignored, the old lady spoke cheerfully, stoically refusing admittance to the tears that lay so near the surface. Only when she was alone did her face show any of the dismay that filled her tired old heart. These were hard days for Grandma Davis.

"Seems somehow as if she'd grown smaller—shrunk, you might say," commented Lizzie Baker to Salina Knowles. "It ain't easy to make changes at Grandma's age; and she's keepin' up before Charmian more'n's good for her. And I'm sorry for Charmian, too. I ain't ever see a young person that set such store on anything old as she does on that old house. I declare, Salina, there's times when I wish whoever's buyin' it would back out of his bargain."

But Miss Lizzie was not to get her wish. It was the last day of August when George K. hailed Charmian as she passed the bank, and led her into the little room which had a formid-

able "Private" on its door; but which was in reality no more private than the air we breathe, because only on rare occasions did the president of the Wickfield National close his door. He closed it now, however, and asked: "What you been up to this afternoon?"

Charmian smiled as she responded: "Why all this privacy? I've been to the library, as you might deduce from this armful of books. But I got more than the books, Uncle George. I got a job! Miss Garfield has asked me to help at the library two hours each afternoon. Isn't that wonderful? I can easily leave Grandma that long, or get Miss Lizzie to come in and sit with her; and it will bring in a little money. It was Gam's idea. I'm going to stop at his office now and thank him."

"Well, that's fine!" George K. spoke cheerfully. "It'll do you good to get away each day, and see folks. What I called you in for, Charmian, was to say that you can sign the deed at ten o'clock tomorrow. I just got word that your man will be here then, and wants to see you. I told him to come to the bank—thought maybe it would be hard for Grandma to see the act done, as you might say. I'm thankful now, child, that she deeded the place to you. It would be hard for her to sign the house away. There, Charmian, if you feel like crying, cry on my shoulder; but I advise you to buck up. In the long run most things come out right in this old world. If I didn't believe that truth I shouldn't be as happy as I am, or as fat, either!"

"Or so helpful to the rest of us," added Charmian. "It's all right, Uncle George. I did my crying long ago, and have since acquired such a stiff upper lip that it sometimes hurts! But as Grandma's probably hurt a great deal more, I don't complain. I'll be here at ten. Now I must run up and thank Gam Garfield for his suggestion, and then skip home. Thanks for—everything."

"Haven't you forgotten something?" asked George K. as she reached the door.

Charmian turned, her eyes aglow with sudden merriment. This was an old joke of childhood's days, when as a little lass she often slipped into the room marked "Private," in search of the wee pink checkermints which George K. used to tell her "grew in his pockets." If, in those days, she forgot to bestow upon him a grateful kiss, he reminded her thusly and was rewarded by a sometimes strangling embrace. She came back now, laughing as she kissed him. Then the door closed behind her, while George K., watching from a window, saw her cross the street and start up the narrow stairs that led to Gam Garfield's office in the building opposite.

"My Bill must have been crazy when he let that girl slip through his fingers," he complained to the four walls. "However, all's well that ends well, and I hope . . ."

What he hoped was interrupted by a fellow banker from Eastboro, who, as was everybody's custom, walked in minus the formality of a knock.

Charmian, finding Gamallie busy with a client, delivered her thanks briefly and moved on up Main Street with lagging feet. No need to tell Grandma that the dread day was at hand, she thought. Let her sleep in peace this last night under her own roof-tree. As for herself, she must swallow that lump in her throat and remember, as George K. said, that things usually turn out all right. It was wonderful that Miss Garfield needed help at the library just now. She must write Jim about it—if ever he answered her last letter. Miss Lizzie's latest bulletin from California had brought news that he had "a girl." Perhaps he was too busy playing 'round with her to write to "the girl he left behind him," thought Charmian whimsically; and, having reached the house, stopped to look up at the carved pineapple above the door.

"I hope they'll give it the coat of gold leaf it deserves," she said, and went inside, laid her books on the table by the door, and then stood still, staring into the room that had been a shop for almost as long as she remembered.

"Haven't you a word of greeting for the returned prodigal?" asked Jim Bennett.

He arose from where he was sitting beside Grandma, and caught Charmian's hands in both of his.

"Steady!" he said. "Folks have been known to expire of shock. I'd have warned you of my arrival but I started at a moment's notice, al-

most. Sit down, Charmian, and catch your breath."

He pushed her gently into the rocking chair, and drew up a straight-backed old Chippendale for himself. In a sort of daze Charmian heard her grandmother say anxiously: "Haden't you better get her a drink of water?"—and at that she laughed.

"I'm not faint," she protested, "merely struck dumb, as you might say, Jimmy, you look—well—"

"Different, doesn't he?" put in Grandma; and Charmian, noticing her for the first time since this amazing homecoming, saw that her sweet old face looked happier than it had for days. "He's got a sort of air about him," she was saying. "I saw it right off when he came in. He looks—stylish."

"Gosh!" breathed Jim. "You talk like my mother before she fell in love with a fruit ranch."

Charmian laughed, spontaneously, and Grandma asked: "You mean you're playing second fiddle these days?"

"Something mighty near it," grinned Jim. "Will you believe it, Grandma, my dotting mother hardly noticed when I deserted. I left her sampling a new variety of citron. Gee! but it's good to be home!"

"Then you haven't fallen in love with—" began Charmian, when Grandma interrupted in horrified reproach:

"What do you mean, child, asking such a question?"

"I was only going to say in love with California," explained the girl, and Jimmy roared.

"No," he replied, after his mirth had somewhat subsided. "I didn't lose my heart to—California. It has its good points, of course. Mother and Aunt Sophie are nuts over it—boosters, I call 'em; but as for me—I wouldn't swap one of Wickfield's winding, elm-shaded streets for the whole darn state of California, and that's the truth."

"There!" ejaculated Grandma with satisfaction. "I always said that there's not a prettier spot on earth than Wickfield. Here comes the doctor, Charmian. He seems to be in a hurry. Maybe—"

But with haste that seemed to both Grandma and the young man rather uncalled for, Charmian sprang up, and was at the door when John Carter reached the steps. She did not guess that in the moment that followed, both those loyal hearts in the room beyond were to be wrenched almost to the breaking point. She did not realize that the front door was reflected in the long mirror that hung beside it, nor would it have troubled her if she had known. All she saw or thought of was the light in John Carter's eyes as he thrust a scrap of yellow paper into her hands. She read the message and looked up, her lovely face reflecting the happiness that shone from his; and the next moment he caught her in his arms and kissed her, rapturously, exultantly.

(To Be Continued.)

Increased Wheat Consumption

Strong Tendency Of Tropical Countries To Use More Flour

A report issued by the Ford Research Institute, of Stanford University, California, shows a strong tendency towards increased wheat consumption on the part of tropical countries. The survey covers the years from 1909 to 1927, and reveals a growth in the consumption of wheat flour in excess of the growth of population; the years from 1909 to 1913 showing an annual average per capita use of 11.24 pounds of flour while the period from 1923 to 1927 shows a rise to 12.67 per cent.

LUMBAGO?

A pain in the lower part of your back can torture you. But not for long, if you know about Aspirin! These harmless, pleasant tablets take away the misery of lumbago, rheumatism, neuralgia, headaches, toothaches, and systemic pains of women. Relief comes promptly; is complete. Genuine Aspirin cannot depress the heart. Look for the Bayer cross, thus:

WHOLE FAMILY HAD DYSENTERY

Dysentery is one of the worst forms of bowel complaint and should be checked at once as its termination often proves fatal.

Mrs. H. F. Stewart, Findlater, Sask., writes:—"Two years ago we were all very bad with attacks of dysentery. My husband got a bottle of Dr. Fowler's Extract of Wild Strawberry and after taking three or four doses we were completely relieved. Since then we have never been without a bottle of it in the house."

On the market for the past 85 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Explore Arctic With Submarine

Sir Hubert Wilkins To Cross Polar Regions By Undersea Passage

Sir Hubert Wilkins, arriving in New York on the North German Lloyd liner "Bremen," announced that he had virtually completed plans for his undersea passage in the North Polar regions, which he will undertake next summer in an obsolete submarine, which will be placed at his disposal by the Navy Department.

He has gone to Philadelphia to examine the discarded submarine O-12, which he plans to rechristen the "Nautilus." In this out-of-date craft, Sir Hubert, with several other scientists and a crew of 18, will explore beneath the ice-choked waters for a period of about 50 days.

Sir Hubert expects to cover some 2,500 miles during this period. The submarine will be equipped with an ice-cutting device that will bore a hole upward, when the submarine's super-structure is close to the bottom of the ice floes. He will thus be able to send men to the surface of the water through the ice to conduct experiments and make observations.

The submarine will attain the speed of between three and four knots, when submerged. He expects to leave New York next May in the submarine and proceed to Spitzbergen. From that port he will then begin his undersea studies of currents, etc., and will pass under the North Pole emerging in the ice floes of the Behring Sea.

During the passage beneath the surface of the northern waters, Sir Hubert plans to broadcast daily with a special radio set. The submarine is 175 feet in length. Among those who will accompany the explorer on his Polar voyage will be Dr. H. V. Sverdrup, who accompanied Amundsen on several explorations, and Dr. Beining Meindez.

Persian Balm—the one toilet requisite for the dainty woman. Delightful to use. Leaves no stickiness. Swiftly absorbed by the tissues. Delicately fragrant. Imparts a velvety loveliness to the complexion. Tones up the skin. Soothes and banishes all unpleasant roughness or chafing caused by wind and other weather conditions. Makes hands soft and white. Creates an elusive, essentially feminine charm. Persian Balm is indispensable to women of refinement.

A Valuable Stamp

One Cent Stamp Issued Many Years Ago Now Worth \$40,000

Probably the most classic example of the economic law that scarcity creates value is on exhibition in Boston, Mass.—a one cent stamp worth \$40,000.

It is the property of Arthur Hind, Utica, N.Y., manufacturer, hotel owner and philanthropist, whose \$500,000 collection of stamps constitutes, financially speaking, just about half of the National Philatelic exhibition of 1930, which was opened at Horticultural Hall, in Boston, Mass.

The history of the stamp goes back to 1866, and to British Guiana. The postmaster of that then isolated colony had found his supply of stamps exhausted. In the emergency a local printer was called into conference, and, with the aid of a picture of a ship, borrowed from a local newspaper, and a hand-set inscription, the stamp was turned out.

A few days later the regular supply arrived and the makeshifts were destroyed. Sixty years later, the only known copy came into the possession of Hind for \$32,000, and today collectors say it is worth at least \$40,000.

Keeping World Supplied With Paper

The forests of Canada continue to be the chief source of the world's paper supply. During June, Canadian paper was exported to 33 countries, ranging alphabetically from Australia to Uruguay.

Minard's Liniment for Lumbago and Neuralgia.

Little Helps For This Week

"Let thine heart keep my commandments."—Proverbs iii. 1.

Rabbi Jehosha had the skill To know that heaven is in God's will; And doing that, though for a space One heart-beat long, may win a grace As full of grandeur and of glow As princes of the chariot know.

—James Russell Lowell.

God would have us live; if we live we cannot but know, while all the knowledge in the universe cannot make us live. Obedience is the road to all things. It is the only way to grow able to trust Him. Love and faith and obedience are sides of the same prism.—George MacDonald.

Choked For Air. Some little irritant becomes lodged in the bronchial tubes, others gather, and the awful choking of asthma results. Nothing offers quite such quick and positive relief as Dr. J. D. Kellogg's Asthma Remedy. The healing, soothing smoke or vapor penetrates, clears the passages and gives untold relief. It has behind it years of success. It is the sure remedy for every sufferer.

Hittite Castle Door

The Chicago Oriental Institute Makes Interesting Discovery

The Chicago Oriental Institute expedition, excavating at Alishar, has discovered a large Hittite castle door ornamented with bas-reliefs representing deer. The door has been transferred to the Angora Museum.

Road builders in Scanlon recently uncovered a chiseled stone, which aroused the curiosity of a highway engineer. He continued the digging and found Byzantine vases and pieces of money, apparently deliberately buried beneath the rock, which may mark a treasure trove.

For all Skin Abrasions — Minard's Liniment.

U.S. Cost Of Living

The United States Department of Labor, through the bureau of labor statistics, has issued a report on changes in the cost of living in the United States in recent years, which shows a decrease of 2.1 per cent. between June, 1929, and June, 1930. The information given is based on actual prices obtained from merchants and dealers in 32 representative cities.

If baby has COLIC

A CRY in the night. Colic! No cause for alarm if Castoria is handy. This pure vegetable preparation brings quick comfort, and can never harm. It is the sensible thing when children are ailing. Whether it's the stomach, or the little bowels; colic or constipation; or diarrhea. When tiny tongues are coated, or the breath is bad. Whenever there's need of gentle regulation. Children love the taste of Castoria, and its mildness makes it safe for frequent use.

And a more liberal dose of Castoria is always better for growing children than strong medicine meant only for adult use.

Fletcher's
CASTORIA

The Handy Bottle

Minard's is the sure relief in the Handy Bottle. For strains, burns, bruises, boils and blisters.

Burnside Notes

Mr. and Mrs. N. Eckel, and Robert, spent Sunday with Mr. and Mrs. Jake Brichwald, of the Stuart school district.

There will be a dance in Lone Pine Hall, on Friday evening, September 26th. Bellamy's Orchestra will furnish the music.

Winnie, Hilda, and Lewis Spraggs, Mrs. Joe Clarke, and Mr. Ernie Simmonds, spent Sunday with Mr. and Mrs. Bernard Woods.

The Harvest Home services in Lone Pine Hall were well attended on Sunday. On Monday evening, a chicken supper was served in the basement of the hall. After the supper, Rev. A. E. Hayes presided over a good program of instrumentals, dialogues, readings, duets, quartettes, and several anthems by the Didsbury United Church Choir.

Melvin Notes.

Since school started, we notice Ross goes west, instead of east.

Mr. and Mrs. Geo. Youngs spent Sunday at Mr. Tom Duncan's.

Cheer up, George, messages can be sent to the moon, as long as Johnnie acts as a relay station.

Mr. and Mrs. R. Irwin, and Mr. and Mrs. P. Johnston, spent Sunday with Mr. and Mrs. Gibbs.

Bill says he must play safe, and top his load in the field, in case it rains before he gets back to the machine.

Mr. and Mrs. Gardner and family, of Calgary, and Miss Ada Cornford, of Vancouver, spent Sunday at the home of Mr. and Mrs. Chas. Youngs.

The Didsbury barbers are undoubtedly rejoicing, now that the swimming in the Dog Pound is over. Tommy says cutting hair that has been shampooed with Dog Pound Special, is rather tough.

WEDDINGS

On September 12th, at the M. B. C. Parsonage in Didsbury, occurred the marriage of Mr. Benjamin Goertzen, and Mrs. Annie Wallace, both of Sunnyslope, Alberta. Rev. C. J. Hallman officiated.

Our heartiest congratulations are extended to the happy couple.

RALLY MONTH

As previously announced, the month of September is being observed by the Evangelical Church, as Rally Month. Last Sunday, the Ladies' Aid and the W.M.S. conducted both the morning and evening services in a most commendable way. Those taking part in the morning service, were: Mrs. J. V. Berscht, chairman, Mrs. Roppel, spokesman, Mrs. Rieder, pianist, and Mesdames Thauler and Power, who rendered a duet. In the evening service, Mrs. Roppel acted as chairman, with Miss Laura Liesemer at the piano, and Mrs. E. Reitzel, Mrs. J. Tuggle, Westcott, and Mrs. Wm. Harder, Sunnyslope, each gave a splendid address on timely topics. "Jesus, Lover of my Soul" was also rendered as an octave, with a very pleasing effect, by a group of ladies. Next Sunday will be recognized as Men's Sunday, under the auspices of the Young Men's Bible Class, of which the pastor is teacher. A male quintette (father and four sons) from the 1st Baptist Church, Calgary, will furnish both song and speech in the evening service. On the following Sunday, September 28th, the Calgary Salvation Army Band is expected for the evening service.

A rash—a skin sore Eczema?

DDD has no rival in the treatment of skin disorders. A doctor's formula that doctors recommend. An active fluid that destroys the disease germs in the skin. DDD cools, soothes, heals. The blemished skin is washed clean.

H. W. Chambers, Didsbury

You can depend on advertised products.

Advertising is the most powerful searchlight known to business. It focuses the attention of a community or a continent on a particular product. It gives that product the advantages of a widespread test by the buying public. But it cannot persuade that public to buy any article it has tested and found wanting. Manufacturers and merchants know this. They know also that advertising an unworthy product does only one thing: it brings magnified attention to its deficiencies. Therefore, before they undertake extensive or consistent advertising, they make sure that their product is right.

Consistent advertising is your best assurance of value and worth. It is fair evidence that the advertising is offering a good product which has been thoroughly tested and approved.

The advertisements in this newspaper have been passed by the highest authority—the buying public.

Farm Wanted At Once

Have Buyer for 320 Acres Improved Farm. Must be located West of Didsbury. Price must be Right. Can make Cash Payment of \$2,000.

Calgary Fall Stock Show.

There has just been issued from the office of the Alberta Live Stock Association, Calgary, the prize list for the Calgary Fall Stock Shows and Sales, which will be held in Victoria Pavilion on the exhibition grounds, November 3rd, 4th and 5th.

Prize money to the total amount of \$5,514 is offered in the various divisions. This is divided as follows: open classes for cattle, \$2,170; open classes for sheep, \$1,620; open classes for swine, \$1,179. In addition \$260 is the offering in the girls and boys pig feeding competition, \$155 for the girls and boys, lamb feeding competition, and \$130 for the lamb trimming classes. In the last mentioned class, \$100 of the total amount is offered by Hon. W. H. Cushing, who has for several years taken a special interest in this competition.

In addition to show classes in different kinds of live stock, there

will be auction sales of beef and dairy cattle, sheep and swine. Purebred males and purebred and grade females may be entered for sales.

Cards of Thanks

We wish to thank the Matron and nurses of the Didsbury General Hospital, for their kindness and attention during the last few weeks.

Mrs. C. L. Cipperley,
and Dorothy.

Mr. and Mrs. Wm. Robertson, and Mr. and Mrs. Avarde Orde, wish to express their deepest gratitude for the many kind expressions of sympathy and floral tributes received during their recent sad bereavement.

A large number of local sportsmen went out after the ducks this week. We have not heard, so far, of any big bags this season.
